Thule welcomes Yepp into the Active with Kids family by introducing brand new child bike seat Thule Yepp Nexxt.

Thule presents two new family members in the Active with kids category, Thule Yepp Nexxt Maxi and Thule Yepp Nexxt Mini. The light-weight and contemporary design of Thule Yepp Nexxt child bike seats let you and your child enjoy everyday bike rides together – safely, easily, and in style.

The design is based on the combined experiences of the development teams behind the two very successful series of Yepp and Thule child bike seats. The use of a technology and structure similar to that of modern bike helmets has resulted in a number of features and benefits. Thanks to the combination of strong, shock-absorbing, and water-repellent materials (EVA, EPP and PP), the seats are very lightweight, comfortable, strong, safe, and insulating, and have a stylish, sporty look.

Thule Yepp Nexxt comes in both a rear and a front mounted version. They both share the same contemporary design and offer a range of user-friendly technical solutions that will make your daily commutes a breeze.

Thule Yepp Nexxt Maxi makes rear rack mounting easier than ever. Thanks to the innovative and easily adjusted universal fitting system, the seat is quick to mount/dismount on any rear rack that can handle a 25 kg load. The universal mount ensures that the seat fits standard rear bike racks as well as racks with EasyFit window, without using any adapter.

Thule Yepp Nexxt Mini is easy to mount/dismount in seconds on both normal and most ahead handlebar stems with a smart quick-release bracket.

The Thule Yepp Nexxt bike seats provide a stable and secure ride for your child, from baby (from 9 months*) until pre-school (up to 3 years/15 kg for the Mini version). Your child sits safely and comfortably thanks to the padded and shock-absorbing seat materials, while the adjustable foot rests and harness ensure a perfect fit as your child grows.

The Thule Yepp Nexxt seats come with an innovative 5-point safety harness combined with a smart magnetic safety buckle. The design of the harness, with stand-out shoulder pads, means that your child will not interfere with the harness when being placed into the seat. Once your child is seated, the magnetic buckle will quickly snap the harness into place and you'll be on your way in seconds, knowing that your child is safe and comfortable.

For improved visibility, Thule Yepp Nexxt Maxi comes with a built-in reflector that can be replaced by a rear light. To make the ride even more comfortable for your little one, Thule Yepp Nexxt Mini can be equipped with handlebar padding and a windscreen.
